

POWER FLAME

WOOD PELLET

PRODUCT CARD

Power Flame RUF Pine

Wood type	100% pine
Calorific value	17,9-19,3 MJ/kg
Ash content	<0,9%
Moisture content	<10%
Packaging	10kg 960 kg pallet

APPLICATION:

Power Flame RUF Pine is an ecological wood briquette made from **100% natural pine sawdust**. With no artificial additives, it guarantees long-lasting and efficient combustion. Ideal for the fireplace, it provides pleasant and effective heating. It is a responsible choice for the environment, supporting its protection.

PRODUCT CHARACTERISTICS:

- Good calorific value:** With a calorific value of 17.9-19.3 MJ/kg, Power Flame RUF provides strong and efficient heating, creating a pleasant and warm climate in your home. To achieve the greatest efficiency, it is recommended to use a small flame and limit the air supply. This allows for longer burning times.
- Eco-friendly alternative:** By choosing the RUF Power Flame, you are supporting sustainable practices and reducing emissions, which contributes to the protection of our planet. It has approximately 0.9% ash, which reduces the need for frequent cleaning of the cooker. The ash created after burning can be used as a natural fertiliser for your garden or lawn.

- Affordable:** Biomass briquettes such as RUF's Power Flame are an economical choice compared to traditional energy sources, saving money in the long term. They are also convenient to use and easy to store.
- No chemicals:** No improvers or binders are added to our briquette during production, so no harmful gases or chemicals are emitted during combustion, which also reduces the amount of smoke and sludge produced.

PACKAGING AND SHIPPING:

The briquette is packed in **10 kg blisters**, stacked on wooden pallets (**96 blisters = 1 pallet**) and secured all around with stretch film. There is a plastic hood on top to protect it from the weather.

It is extremely important how to store purchased fuel. Briquette should be stored in dry closed spaces (boiler rooms, basements). Briquette is a material that absorbs moisture very easily, which means that it must not be left to the possibility of exposure to weather conditions.

We deliver our goods in accordance with European standards. Maximum quantity per order - **24 pallets (full truckload)**.
