Power Flame Royal 100% Pine

Wood type	100% pine
Standard	ENPlus PL320
Calorific value	>19MJ/kg
Ash content	<0,5%
Moisture content	<10%
Diameter	6±1 mm
Length	3,15-40 mm
Packaging	15kg 990 kg pallet

APPLICATION:

Power Flame Royal is a high-quality wood pellet that is made entirely from pine wood sawdust. Its excellent performance and compliance with **ENPlus PL320** standard make it unparalleled choice for all owners of pellet fireplace, stoves and boilers.

PRODUCT CHARACTERISTICS:

- Excellent quality:** Power Flame Royal is carefully manufactured from pine wood sawdust. The pellets are compressed under high temperature and pressure, so it does not crumble or disintegrate.
- Low ash content:** The ash content of this wood pellets is less than 0.5%, which means that the combustion process is cleaner and the need for frequent cleaning of the stove is greatly reduced. The ash produced after burning, can be used as fertilizer for the lawn or garden.
- Low moisture:** With a moisture content of less than 10% (mostly in the neighborhood of 5%), Power Flame Royal ensures that there are no fire problems and high combustion efficiency, which translates into energy savings.

- High calorific value:** The product has a calorific value of 18 MJ/kg, which means it provides strong, long-lasting and effective heating.
- Purity:** It is created without the use of chemical additives, improvers or binders, ensuring that it does not contain any substances harmful to humans or animals.

PACKAGING AND SHIPPING:

The pellets are packed in moisture-protective PE plastic bags **weighing 15kg**, stacked on wooden pallets (**66 bags = 1 pallet**) and secured all around with stretch film. There is a plastic hood on top for weather protection.

It is extremely important how to store purchased fuel. Pellets should be stored in dry closed spaces (boiler rooms, basements). Pellet is a material that absorbs moisture very easily, which means that it must not be left to the possibility of exposure to weather conditions.

We deliver our goods in accordance with European standards. Maximum quantity per order - **24 pallets (full truckload)**.
